

The Rowperfect Polar receiver used to collect heart rate data from a **POLAR** chest strap transmitter has been around for over a decade already. During that time, Polar has extended its product line with several new watches, transmitters and technologies. The Rowperfect Polar receiver uses the 5KHz transmission frequency. This document describes the compatibility between Polar chest straps and the current (as of 2012) Rowperfect Polar receivers.

Type/Model	Photo	Compatible
Polar T61 non-coded transmitter (*)	n/a	Yes
Polar T61 coded transmitter (*)		Yes
Polar T31 non-coded transmitter	n/a	Yes
Polar T31 coded transmitter		Yes
Polar Wearlink+ coded transmitter		Yes
Polar Wearlink+ <i>Bluetooth</i> transmitter		No

(\*) The Polar T61 transmitter is no longer available.

Polar transmitters can be purchased through the Polar webshop <http://www.polar.fi/> or one of its affiliates, and they are available as separate products or combined with a Polar watch.

Examples (2012):

- the T31 non-coded transmitter as a separate product (30 €)
